SOFTWARE ENGINEER

CAREER OBJECTIVE:

A software engineer looking for a challenging new role in software development with the opportunity to work with the latest technologies on challenging diverse projects. As a software engineer, my objective is to make a positive impact on clients, co-workers and to other people using my skills and experience to create applications that will make their life easier. My goal is to obtain a creative and challenging position that enables me to gain valuable commercial experience and improve my skills.

SKILLS:

Backend Development
Primary - NodeJS (Express)
Secondary - PHP Laravel, Python (DJango), Codeigniter4, NodeJS (Serverless), Golang, WordPress

Frontend Development
Primary - ReactJS, NextJS, Redux, Typescript, HTML, CSS, MaterialUI, TailwindCSS, SASS, Styled Components
Secondary - VueJS, Vuetify, AngularJS, JQuery, Bootstrap, Ant Design, Adobe React Spectrum, Reactstrap, Codeigniter View4, LESS

Database
Primary - MongoDB (Mongoose)
Secondary - MySQL, PostgreSQL, Firebase

Testing - Jest, Mocha, PHPUnit

AWS - AWS S3, AWS Lambda, AWS DynamoDB

Miscellaneous - GraphQL, REST API, Docker, Mailtrap, CI/CD, Adobe XD, Figma, ChartJS, Puppeteer, Lodash, Bitbucket, Gitlab, Github

PROFESSIONAL EXPERIENCE:

Software Engineer, Dec 2021 - Present
Sprobe Inc.
- Developed and implemented OOP principle code to ensure high-quality, clean, scalable, reusable, secure, and maintainable ensuring robustness and testability.
- Participated in scoping and estimating software requirements to ensure accurate project planning and execution.
- Participated in sprint planning and daily stand-up meetings, contributing to project alignment and progress tracking
- Leading, managing, and helping a team of engineers on one of my projects.
- Participated in code reviews, suggest code refactors and contribute to the continuous improvement of our development processes
- Conducted unit testing and end to end testing on the codebase to ensure optimal efficiency and reliability.
- Responsible for designing and implementing RESTful APIs to support frontend functionality.
- Engineered and executed outstanding user interfaces and experiences in alignment with design specifications

Senior Software Developer, Freelance, July 2022 - May 2024
Highly Succeed Inc.
- Developed and implemented high-quality, clean, scalable, reusable, secure and maintainable code ensuring robustness and testability.
- Engineered and implemented exceptional UI/UX solutions in alignment with design specifications and wireframes.
- Implemented the Atomic Design Pattern on my ReactJS projects to enhance scalability and maintainability of component structures.
- Participated in code reviews and contribute to the continuous improvement of our development processes
- Leading, managing, and helping a team of frontend developers on one of my projects.
- Collaborate with and provide guidance to junior developers on their tasks.
- Responsible for designing and implementing RESTful APIs to support frontend functionality.

Software Developer, Feb 2020 - Dec 2021
Valhalla Online Services Inc.
- Developed and implemented software applications on analyzed requirements and understanding of industry technical standards
- Designed and developed software with emphasis on performance and scalability
- Engineered and implemented exceptional UI/UX solutions in alignment with design specifications and wireframes.
- Responsible for designing and implementing RESTful APIs to support frontend functionality.

Web Developer, Feb 2017 - Feb 2020
Philwebservices Inc.
- Develop and maintain websites using CMS sites, especially wordpress.
- Converting website designs from PSD to HTML using LESS/SASS/CSS.
- Creating multiple sites to be responsive/mobile friendly using bootstrap and jQuery.
- Edit and optimize images using Photoshop.
- Manage team's tickets in Trello board for better task management.
- Uploads content changes from the client.
